MISSION

The mission of Colorado POST is to establish and maintain standards for peace officer training and certification that are relevant, realistic and responsive to our ever-changing world.

Law Enforcement Code of Ethics

As a Certified Peace Officer, my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and, to respect the Constitutional rights of all men to liberty, equality and justice.

I will keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life. I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided in me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.

I will never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force of violence and never accepting gratuities.

I recognize the badge of my office as a symbol of public faith and I accept it as a public trust to be held so long as I am true to the ethics of law enforcement service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.

 - b. Grasp the slide by the serrated portion and pull it all the way back
 - c. Release the slide and let the spring action carry the slide forward
 - d. Engage any appropriate safety or de-cocking lever

C. Tactical Reloading a Semi-Automatic Pistol: Advantages and Disadvantages

1. When
2. Left/right hand procedure
3. Benefits of going for fresh magazine first vs. the partial magazine first
 - a. Fresh magazine first: Used in cases where there is a magazine disconnect in the handgun. The advantage is that the gun will be able to fire the last few rounds as long as the magazine is seated in the gun. The disadvantage is that the officer will be handling two magazines in one hand under stress
 - b. Taking old magazine first: Used in most other cases. The advantage is that the motion more closely resembles the motion of a combat reload (commonality of training). The disadvantage is that the officer only has one round to shoot during the transition
 - c. Stowage of partial magazine

- D. Combat Reloading a Semi-Automatic Pistol: Advantages and Disadvantages
 - 1. When
 - 2. Left/right hand procedure
- E. Malfunction Clearance

 - a. Legal shooting decisions
 - b. Shooter's responsibilities
 - c. Mind set conditions
 - d. De-Escalation
 - e. Medical aid considerations

Method of Instruction:

1. A minimum of 7 live fire decisional exercises must be conducted per student
 2. A minimum of 4 reality-based training scenarios must be conducted per student
 3. Ratio of one to one instructor to student ratio required during all live fire decisional exercises and reality-based training scenarios
- A. Discuss the Following Points Prior to Any Live Fire or Reality Based Training
1. The use of deadly force is authorized by law in the performance of an officer's duties. Review the Colorado statutes related to the application of deadly physical force;
 - a. A peace officer is justified in using deadly physical force to make an arrest only when all other means of apprehension are unreasonable given the circumstances, and:
 - (1) He or she has objectively reasonable grounds to believe, and does believe that the person has committed or attempted to commit a felony with the use or threatened use of a deadly weapon; and
 - (2) Without immediate apprehension the person remains an imminent threat to the officer or others by the use or threatened use of force that may result in SBI or death.
 - b. A peace officer is justified in using deadly physical force to defend himself or herself or others from what he or she reasonably believes is the use or imminent use of force that may result in SBI or death.
 - c. A peace officer is justified in using deadly physical force if he or she has objectively reasonable grounds to believe, and does believe that the

subject is attempting to escape by the use or threatened use of a deadly weapon, and without immediate apprehension remains an imminent threat to safety of the officer or others by the use or threatened use of force that may result in SBI or death.

- d. Prior to using firearms or other deadly physical force, a peace officer shall identify himself or herself as a peace officer and give a clear verbal warning of his or her intent to use firearms or other deadly physical force with sufficient time for the warning to be observed, unless to do so would unduly place peace officers at risk of injury, would create a risk of death or injury to other persons.
- e. When force is used, the force employed shall not create a substantial risk of injury to other persons.
- f. A peace officer shall not use deadly physical force to apprehend a person who is suspected of only a minor or nonviolent crime.
- g. A peace officer has a duty to intervene to stop or prevent another officer from using excessive force. The intervention and excessive force must be reported.

2. Decisions to shoot must be based on the lawful use of deadly force; considerations (factors) found in case law are:

- a. *Graham v. Connor*, 490 U.S. 386 (1989) (SCOTUS):
 - (1) The question is whether the officer's actions are "objectively reasonable" in light of the facts and circumstances confronting the officers in each particular situation, without regard to their underlying intent or motivation.
 - (2) "Facts and circumstances" of each particular case, considerations:
 - (I) The severity of the crime at issue
 - (II) Whether the suspect poses an immediate threat to the safety of officers or others.

(III) Whether the suspect is actively resisting arrest by flight.

b. *Plumhoff v. Rickard*, 572 U.S. 765 (2014) (SCOTUS):

(1) The court held on the basis of the facts of this case that the officers were justified to continue firing at the suspect who was creating a severe threat to public safety until the threat to public safety had ended.

c. Although not a legal standard, the following elements are a training tool to explain the justification for deadly force

(1) Ability (means) - the suspect's ability to cause serious bodily injury or death

(2) Opportunity - considerations are the suspect's proximity to a weapon, the officer, or others; obstacles between the suspect and officers; whether the suspect is restrained or not

(3) Intent – The officer's perception of a threat or imminent threat the person presents to the officer or others based on the totality of the circumstances. The perception must be based on objective factors.

(4) Ability, opportunity, and intent must all be present for the officer to articulate the justification of deadly physical force. The absence of one or more of these elements presents a risk to an officer, which allows for officers to de-escalate. When all three of these elements are present, there is a threat rather than a risk.

3. Responsibilities of the officer:

a. The officer is responsible for every round fired

b. The officer must be able to articulate the elements of Intent, Opportunity, and Ability

4. Mindset conditions (Awareness and readiness)

a. Awareness Spectrum – Can be defined by using the color code:

(1) White –Relaxed, unaware, unprepared

(2) Yellow – Relaxed awareness, aware of environment,

- easy to maintain
- (3) Orange: High level of sensory awareness, specific alert, anticipation, full attention
- (4) Red – UOF encounter – You are in jeopardy, react, use reasonable force based on the circumstances
- (5) Black – Panic, hyper-vigilance, ill prepared

5. De-Escalation

- a. Verbal de-escalation
- b. Tactical de-escalation
 - (1) Tactical positioning
 - (2) Use of distance and cover
 - (3) Waiting for back-up
 - (4) Avoiding unnecessarily compressing time and distance
 - (5) Less intrusive means of force (where feasible)
 - (6) Disengagement
- c. Physical de-escalation
- d. Warning shoots should not be a means of de-escalation

6. Edged and blunt weapon considerations

- a. When confronted by an offender armed with an edged or blunt weapon, the Graham standard must be applied based on the totality of the circumstances; not a mechanical application based on arbitrary distances.

7. Medical Considerations

- a. If injury results from use of force, the officer will notify medical
- b. If the scene is safe, officers should apply first aid to the extent of their training when feasible based on the totality of the circumstances.
- c. As soon as feasible, officers should place the subject in a recovery position.
- d. Ensure that any identified relatives or next of kin of persons who have sustained SBI or death are notified as soon as practicable.

B. Live Fire Decisional Exercises

1. Targets must be a combination of shoot and don't shoot targets. Verbal warnings where feasible should also be included depending on the exercise
2. The students are required to articulate their decisions on each exercise based on the legal application of use of force

C. Reality Based Training Decisional Scenarios

1. A safety officer must be designated and safety procedures in place to ensure that no live ammunition and/or operable firearms are introduced into the training area where the scenarios are being conducted
2. Any medium that forces the student to react to a real person's actions or force can be used. Examples are paintball, Simunitions, Airsoft, and similar technologies
3. If the manufacturer of the medium has written safety guidelines, they will be adhered to
4. These scenarios should be scheduled to include items taught in building search, DIM LIGHT SHOOTING and TACTICAL SITUATIONS
5. The students are required to articulate their actions and the legal application of use of force based on the totality of the circumstances from the start of the scenario to its conclusion

VII. TACTICAL SITUATIONS

Required Minimum Hours: 30

General Learning Goal: The Student will demonstrate commonly recognized survival-based shooting techniques.

Learning Objectives:

1. The student will demonstrate particular shooting skills including, but not limited to:
 - a. Ready positions
 - b. Scanning and Searching
 - c. Shot placement
 - d. Shooter Movement
 - e. Threat Movement
 - f. Multiple Threats and Assessment
 - g. Positional Shooting

- (1) Unconventional positions may be demonstrated through non-live fire exercises
- h. Cover and Concealment
- i. Long Distance Shooting
- j. Strong/Support Hand Only Shooting and Weapon Management
 - (1) May be demonstrated utilizing dummy rounds
- k. Close Distance Shooting
- l. Escalation / De-Escalation
- m. Shooting From and Around a Vehicle
 - (1) May be demonstrated with an inert weapon, marking cartridges or airsoft type of munitions

Method of Instruction:

1. An instructor to student ratio of one to four is required during live fire exercises. This does not include the lead instructor.
 2. The lead instructor will emphasize the four rules of firearms safety.
- A. Ready Positions
1. Low Ready (Extended)
 - a. Arms, fully extended; gun is below eye level just enough to see what needs to be seen. Muzzle is depressed.
 2. Low Ready (Compressed)
 - a. Elbows are bent with the forearms on or close to the ribcage. Muzzle is depressed.
 3. Other Ready Positions
 - a. Position “Sul”
 - b. High ready positions
- B. Scanning and/or Searching
1. Scanning
 - a. After identifying a threat and/or shooting a threat, keep weapon pointed at the threat and scan the area, 360 degrees, looking for additional threats, non-threats,

assisting officers, etc.

- b. Breathing as you scan helps break up “tunnel vision” and refreshes rod cells to restore night vision.

2. Searching

- a. Weapon in a ready position, muzzle follows eyes. Looking for unknown or possible threats.
- b. Searching with a weapon mounted light vs. searching with a handheld light.
 - (1) While searching with a handheld flashlight, weapon can be kept in a ready position and threats and non-threats can be illuminated without the weapon being pointed at them.
 - (2) When searching with a weapon-mounted light, the muzzle of the weapon is also covering anything illuminated by the weapon-mounted light.

C. Shot Placement

1. Upper Chest – Cardiovascular System

- a. Largest part of the body
- b. Contains heart, lungs and major blood vessels
- c. Usually the area to shoot first
- d. Hits to the upper chest will disrupt respiration, circulation and damage vital organs
- e. Starts the “Timer”: Hits to the upper chest do not cause immediate incapacitation, rather rapid blood loss which takes a certain amount of time dependent on quality of hits.

2. Head (Face) – Central Nervous System / Brain Stem

- a. Small target covered in thick, rounded skull that’s difficult to hit
- b. Aim for the eyes / nose / ear canal / base of skull
- c. The “Switch”: Instant incapacitation if brain stem is hit
- d. If initial shots to the chest fail to stop the threat, consider shots to the head

3. Pelvis – Bone structure

- a. Can disrupt the threats mobility
 - b. Femoral artery
 - c. Larger than head
 - d. Multiple rounds to one side of the hip to break up the bone structure
 - e. If initial shots to the chest fail to stop the threat, consider shots to the pelvis
4. Targets of Opportunity
- a. Shoot the largest part of what's available for as long as it's available, if safe and appropriate.
5. Shooting through barriers
- a. Effects on ballistics of ammunition
 - b. Will your rounds penetrate the barrier?
 - c. Multiple rounds to break up the barrier
 - d. Vehicle windshields
 - (1) Shooting into a vehicle, round tends to hit low on the target
 - (2) Shooting out of a vehicle, round tends to hit high on the target.

D. Shooter Movement

1. Lateral Movement
- a. The emphasis should be on large steps, off the line of attack, to the shooter's left or right, avoiding the threat's first hostile action.
 - b. You become a moving target making you more difficult to hit and giving you more time to draw, if needed, and make a lethal force decision.
 - c. Lateral movement should be emphasized continuously in shooting drills when feasible and safe.
2. Forward Movement- Advancing on the threat
- a. Shooter should stay balanced, separating lower body movement from upper body shooting platform.
 - b. Active shooter movement: single officer or with a team.
 - c. May be at an angle to the threat
3. Rearward Movement – Away from the threat

- a. Shooter should stay balanced, separating lower body movement from upper body shooting platform.
- b. Single steps back to create space
- c. Continuous movement backward while shooting
- d. May be moving backwards at an angle away from the threat.

E. Moving threat

- 1. Methods to hitting a laterally moving threat
 - a. Ambush – Hold the sights on a point the threat is moving towards. When the threat is in the sights-press the trigger.
 - b. Tracking – Hold the sights on the moving threat and press the trigger.
- 2. Advancing threat
 - a. Shooter should start to move laterally
- 3. Threat moving away from you
 - a. Make hits before they get too far, if safe and appropriate.
- 4. It is strongly recommended that students complete live fire exercises on moving targets if the training facility allows.

F. Multiple Threats

- 1. Threat Assessment: During an intense, uncertain, and rapidly evolving deadly encounter, officers will address threats as they are perceived
 - a. Considerations in threat assessment
 - (1) Distance
 - (2) Weapons
 - (3) Is the threat shooting at or threatening you or someone else.
- 2. Tactical considerations
 - a. Awareness and avoidance are the best option
 - b. Maintain space between you and threats

- c. Retain ability to maneuver
- d. Make your shots count
- e. Use cover if available
- f. Be prepared to fight to the finish
- g. Withdraw if tactical situation warrants it

G. Positional Shooting

1. Primary Shooting Positions (Other than standing)

a. Kneeling

(1) Supported Kneeling

- (a) Support side elbow is resting on the support side knee.

(2) Unsupported Kneeling

- (a) Elbows are not supported and either the support or strong side knee is up.

(3) Double Kneeling.

- (a) Both knees are on the ground.

b. Prone

(1) Traditional or Military Prone

- (a) Shooter is flat on their belly with legs straight behind them. Heels are together and ankles are flat on the ground. Elbows are on the ground and bent to bring the sights of the weapon to eye level.

(2) Rollover Prone

- (a) Shooter is lying on their strong side with hips at an angle towards their support side with support side leg bent bringing knee up towards their chest. Strong arm is straight, holding weapon straight up and down. Shooters check rests on their bicep to look down the sights.

2. Secondary Shooting Positions

a. Squatting

b. Sitting

- (1) Care must be taken not to cover the strong side leg when drawing from sitting.

3. Unconventional Shooting Positions

a. Shooter on their back (Supine)

- (1) Feet towards threat
- (2) Head towards threat
- (3) Threat to the left
- (4) Threat to the right
- b. Shooter on their side
 - (1) Strong side on the ground, threat to the front
 - (a) Discuss leg position
 - (2) Support side on the ground, threat to the front
 - (a) Discuss leg position

H. Cover/Concealment

- 1. Definitions
 - a. Cover: Anything that stops, turns, or impedes direct or indirect fire
 - b. Concealment: Keeps you from being seen but does not stop incoming fire
 - c. Cover can be Concealment but Concealment is never Cover.
- 2. Cover
 - a. Cover is relative to what it is being shot with. Cover that stops a BB gun might not stop a handgun. Cover that stops a handgun might not stop a rifle.
 - b. Vertical Edge
 - (1) It is best to use the vertical edges of cover whenever possible. It exposes less of the shooter and minimizes the shooter's exposure to ricochets and shrapnel from incoming fire.
 - c. Horizontal Edge
 - (1) Using the horizontal edge requires the shooter to expose their head above the cover making them more vulnerable to direct fire, ricochets and shrapnel.
 - d. Interior walls and doors
 - (1) Walls are usually made of drywall, which does not stop most rounds. Doors are usually hollow and thin.
 - e. Exterior walls and doors
 - (1) Usually thicker, made with siding, brick, stone etc. with doors usually solid. May be good cover.

- f. Weapon's ballistic performance – handgun, rifle or shotgun
 - (1) Know if the cover you are using will stop what you are being shot at with.
 - (2) Material that will stop a handgun round might not stop a rifle or shotgun slug.
- g. Just as important in periods of limited visibility
- h. Emphasize standing back from cover because it allows the shooter to transition from the left to the right side of cover without depressing or elevating the muzzle; it increases the shooter's field of vision, and exposes less of the shooter's body to the threat.
- i. When attaining a sight picture from behind cover, ensure the muzzle is clear of the cover
- j. Consideration must be given to the suspect's location

3. Concealment

- a. Tactical deployment and approach
- b. Darkness, shadows, trees, etc.
- c. Cover can be Concealment BUT Concealment is NEVER Cover!

I. Long Range Shooting (25 Yards and Beyond)

- 1. Distance vs. survivability
- 2. Range of handgun and officer responsibility
- 3. Tactics Involved
 - a. Cover
 - b. Principles of marksmanship
 - c. Threat of rifle/shotgun slugs
 - d. Shooting positions
 - (1) Standing vs. Kneeling vs. Prone
 - e. Advantages and disadvantages of using cover to provide a stable braced position
- 4. MINIMUM REQUIRED EXERCISES

- a. It is strongly recommended that students fire a minimum of 12 rounds from a distance greater than 25 yards.
- b. If shooting beyond 25 yards is not possible due to range limitations, then it is recommended that reduced size targets be used to simulate greater distances.

 - (3) Others
- b. Issue with the slide of an auto pistol being pushed out of battery.
 - (1) Shooter can use support hand to hold the slide in battery and fire one round. Malfunction should be immediately cleared.
 - (2) Shooter can use thumb of strong hand pressed against the back of the slide (striker fired pistols only) to hold the slide in battery and fire one round. Malfunction should be cleared immediately.
 - (3) Weapons mounted lights can be used to create an “off set” to keep the slide from being pushed out of battery.

L. Escalation / De-Escalation of Force

1. Rods and cones
 2. Eye adjustment to light and darkness
 - a. The eye pupil requires about 5 seconds to constrict when going from darkness to light
 - b. The eye pupil requires about 3 minutes to dilate when going from light to darkness

2. A light-colored building will silhouette you as much as a light
3. Use shadows
4. Use cover/concealment
 - a. Different in the dark than during daylight
 - b. Flashlight must protrude past your cover for maximum illumination on the threat and to prevent back splash light from illuminating the officer
5. Work corners
6. Use/stay away from light
7. Don't silhouette yourself or backlight other officers
8. Doorways
9. Lights (turn them on or leave them off)

 - (2) If the flashlight is too long, it may rest on the forearm of the gun hand

- (3) In this position, the button is best activated with the finger if using a side button flashlight, or the thumb if using an end button flashlight
 - b. Chapman method (flashlight is in support hand and pressed along the support side of the gun hand)
 - c. Rogers or syringe method (flashlight is held between the fingers and the thumb or the base of the palm when activating the end button)
 - d. One-handed
 - (1) FBI
 - (2) Neck-index

This qualification course is a pass/fail course and all rounds must be fired and must be on the silhouette to pass. The stipulated head shot must be in the head on or above the chin line of the target. Failure to accurately place the head shot in the head will result in a DNQ. Any rounds not accounted for on the target will result in a DNQ.

- B. General: At the discretion of the instructor alibis are allowed for immediate action malfunctions.
 1. The course must be fired in the given order. All rounds MUST be fired exactly as described and within the time parameters for each stage. Failure to fire all 25 rounds as described will result in a "Does Not Qualify" (DNQ).
 2. Verbal challenges are optional, verbiage and usage is at the academy/agency discretion.
 3. For the purpose of this qualification course, the "standby position" (meaning that the next command will likely be the stimulus to fire) is defined as the hands together and touching (not intertwined) above the waist level in front of the shooter.
 4. "Draw" is defined as starting with the weapon in a secured holster.

5. For the purpose of this qualification course, "ready" is defined as the muzzle of the weapon depressed below the point of aim with the trigger finger outside of the trigger guard and indexed along the side of the slide/frame.
6. For the purpose of this qualification course, "cover" is defined by the facilities available at the range and according to the instructions of the instructor, but must use an actual barricade/barrel/object.

8. For the purpose of this qualification course, cuffing may be done with actual handcuffs OR with a similar size object (block of wood, empty 50 round ammo box, etc.).
9. For the purpose of this qualification course, "head shot" is defined as the head above the neckline. A "no shoot" on the head shot is a DNQ.
10. For the purpose of this qualification course, the flashlight in Stage 4 must be handheld and will be in addition to a pistol mounted light. The student must use an acceptable handheld flashlight method for qualification as taught in the firearms program.
11. Ammunition management is the shooter's responsibility.
